## Community Engagement, Partnerships & Volunteering Network Meeting Agenda

The Schools Network is committed to sustaining and developing community engagement in schools in the coming year with volunteering at the core.

This first network meeting will focus on looking at the differences that school community programmes can make to those involved and introduce the VInspired Volunteering programme. In these challenging times it is also more important than ever schools can clearly demonstrate the impact of their programmes. Bob will introduce delegates to an Impact tool to help with this process.
