

Biology Field Trek to Namibia

In October, a group of 20 A level Biology students travelled with Miss Frater and Mrs Piper-Gale to Namibia. They had fund raised for 12 months to pay for the trip and were very excited to be on this adventure. The objective of the trip was to investigate the ecosystems in Namibia, study conservation efforts to save the Cheetah in Namibia and visit the world famous Etosha National Park.

As well as the daytime activities, the group was camping and cooking for themselves ably supported by Trevor, the local ranger and Evans, the driver. The sights, experiences and personal goals achieved by all members of the group will provide life skills and memories for years to come.

As well as the daily activities, each day, Miss Frater & Mrs Piper awarded a Biologist of the Day medal and a Camper of the Day prize. Ashley Mehaffy, Chloe Nance, Aanya Dave, Rajeet Dave, Rachel Wyles and Jonny Singh were proud medal winners, whilst Ed Searle picked up a special prize for his Ranger-In-Training skills. Camper of the Day prizes were picked up by Ushma Chohan, Rajeeta Patel, Krishan Mistry, Nakul Rajani, Alice Rowland and Balraj Thethi.

This was a fantastic trip, which took a lot of hard work to organise and fund, and it was worth every penny. Well done to all those involved and a huge thanks to everyone who supported our fundraising efforts.

Barbara Frater
