

NCFE Level 2 Beauty Therapy

NCFE Extended certificate in Creative Crafts offers to give students an insight into the world of Beauty Therapy and equip them with skills at various levels depending on the student's ability.

This programme has also been developed to improve in the first instance the students speaking, listening and receptive skills as these are of utmost importance and are required in the work place.

Dedication, time, commitment and regular attendance is required to complete this programme to the required level.

Students are also required to wear a suitable uniform, no jeans or trainers and only small stud earrings in order for assessments to take place. All practical aspects of the programme will be demonstrated and observed by the Teacher. There will be various methods of assessment that take place including oral questions, photographic evidence, mood boards etc.

What is included?

Manicure, Nail Art, Facial and Make up

You will also be required to build a portfolio to show all aspects of your skills, if you work and study hard this will lead you onto to an NVQ in Beauty Therapy. This is the first stepping stone into the world of Beauty Therapy.

There may be a possibility of our Hair salon being open next year and so the option would then be Salon Services where students will undertake studies in both hairdressing and beauty.
